

# COVENTRY

*All welded vinyl  
replacement window system*

*The classic look  
of wood molding  
in a feature rich,  
energy saving  
package.*

- Sash beading that resembles the millwork look of traditional wood windows as well as a sculpted main frame exterior for 'curb' appeal.
- Energy saving foam filling of both the main frame and sash for an added degree of insulation and strength.
- All welded construction of frame and sash for maximum strength.
- Available in white and almond with an optional, light or dark oak interior.
- Super Spacer™, the industry's premier glass system with  $\frac{7}{8}$ " glass edge insulated glazing options.
- State-of-the-art stainless steel constant force balances for years of smooth sash operation.

*Energy saving  
foam filled  
frame and sash*

**Kaufmann®  
Window & Door**

Custom-built quality window and door products

Since 1937

## Series 2200 Window

- 3 1/4" frame depth.
- 7/8" insulated glass in several glazing options.
- Triple seal weatherstrip.
- Full interlock at the meeting rail.
- High quality extruded screen frame with aluminum wire standard.
- High impact vent tab allows restricted sash opening for worry-free ventilation.
- Add Low-E with argon gas and the **Coventry** is a true ENERGY STAR®.

As an ENERGY STAR® Partner Kaufmann has determined that this product meets the ENERGY STAR® guidelines for energy efficiency. Ask us about ENERGY STAR® qualified Products.

## Double Hung

- Modern constant force 'all stainless' sash balance system for years of torque free, smooth sash operation.
- A sloped sill for reliable water run-off, a true double hung look and an easy to clean surface.
- Narrow frame and meeting rails for more viewing area.
- Built in tilt mechanism for easy cleaning of both sashes. Latches are recessed for a sleeker appearance.

## Side Slider

- Available in two lite or three lite end vent.
- Durable brass rollers for easy, finger-tip operation.
- Sloped outside channels direct water away from window.

## Comfort Tite™ Vinyl

- Available in solid white or almond.
- Never needs painting, stain or varnish.
- A lifetime guarantee against rotting, peeling, blistering, corrosion and rust.
- Self-lubricating sash tracks resist binding and provide long-term ease of operation.

## Choose an exterior color to compliment your décor, with high performance heat reflective uPVC coatings.

- A well tested and field proven PVC window coating system that is heat resistant and holds up to the elements.
- Color is guaranteed for 10 years against measurable fading.
- Standard colors include: Almond, Aztec Clay, Black, Chestnut Brown, Cranberry Red, Earthbrown, Forest Green, Savannah Wicker, Statuary Bronze and Storm Gray. Custom color matching is available.

Almond	Aztec Clay	Black	Chestnut Brown	Cranberry
Earthbrown	Forest Green	Savannah Wicker	Statuary Bronze	Storm Gray

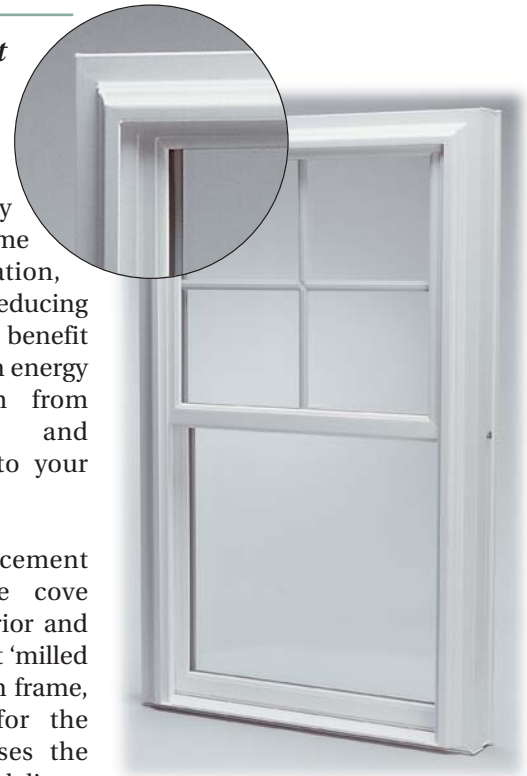

(Actual color may vary from illustrations)

## Coventry Series

*State-of-the-art styling that combines energy savings with multi-faceted value for your home.*

The **Coventry** immediately improves the comfort of the home by reducing air infiltration, eliminating condensation and reducing exterior noise. It continues to benefit over the years with energy savings, freedom from maintenance and increased value to your property.

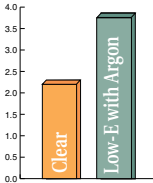

Exterior

This top of the line replacement window offers a distinctive cove molded sash both on the interior and exterior. Continuing the elegant 'milled look' to the exterior of the main frame, creates a graceful outline for the window opening and increases the 'curb' appeal of your home. The delicate reveal of the frame and sash conceals the strongest welded construction in the industry.

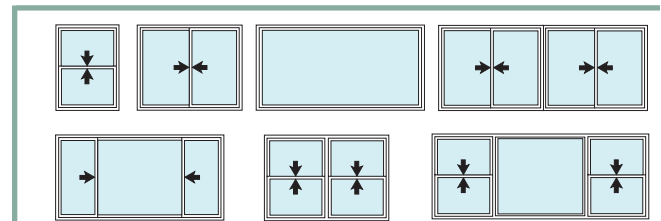

Foam filled frame and sash – standard on every **Coventry** – provides greater insulation as well as greater frame rigidity. Maximize your energy savings with the addition of Low-E glass. Argon gas comes standard with our Low-E package and this combination increases R value by better than 67%. Low-E glass with argon also helps to block harmful ultraviolet rays, reducing premature discoloration of furniture, fabrics and carpets.

Also standard with every window is Super Spacer™ by Edgetech. Super Spacer structural foam spacer is the best 'warm edge' in the business. Warm edge means better insulation and reduced condensation on the interior of the window.

Contoured muntins complete the traditional look of the **Coventry**.

## Custom built for your home.
